Legendre UK appoints Pierre Pellerin as Operations Director

Pierre Pellerin, Operations Director – Legendre UK

Construction and real estate firm Legendre UK has announced the appointment of Pierre Pellerin as its new Operations Director.

Pellerin's appointment follows Groupe Legendre's expansion into the UK construction market in 2015 and a strong period of growth over the last 18 months. The focus of Pellerin's new role will be to manage all the construction sites in the UK, and act as the main point of contact between production teams, Legendre UK senior management, and the firm's clients across all sites. Pellerin will support Thomas Vandecasteele, Managing Director at Legendre UK, with existing schemes, ensuring these are properly managed and delivered on time. Pellerin's role will enable Legendre UK to grow annual revenues for the construction arm of the firm, as well as its real estate and investment branches.

To his role as Operations Director, Pellerin brings over 15 years' experience of managing complex projects across the UK, North America, and France. Pellerin's expertise spans across the production, preconstruction, operations, and procurement process. Prior to joining Legendre UK, Pellerin worked at a large multinational Tier 1 UK contractor for 10 years where he covered multiple roles including Project Director and Preconstruction Lead.

Thomas Vandecasteele, Managing Director, Legendre UK, said: "We welcome Pierre to the team, as we continue to expand in the UK construction market and build on our track record of delivering complex projects. We place great emphasis on recruiting the best staff, and Pierre's diverse and international experience is vital for our team. Pierre's appointment reinforces a core value that underpins our business and informs our work, which is to deliver high-quality projects and provide maximum value for our clients."

Pierre Pellerin, Operations Director, Legendre UK, said: "This is an exciting time to join Legendre UK with the opportunity to support the company's expansion here and oversee technical and complex projects. I was drawn to the company by its innovative approach, which in the current climate is crucial and sets Legendre UK apart."

Legendre UK is currently working on the refurbishment and extension of Shorts Gardens and the delivery of two Pocket Living sites in London, and the co-investment and construction of Horizon St Helier Harbour, Jersey.

Notes to Editors

[About Groupe Legendre and Legendre UK](#)

A French family-owned company founded in 1946 near Rennes, Legendre expanded into the UK market in 2015, with offices in London and Jersey. The company is also active in Switzerland and Portugal, with an office in Lisbon, and has renewable energy projects in West Africa.

About Legendre UK projects

Located in the heart of London's West End, Shorts Gardens features a complex refurbishment and conversion of a historical logistics building into a mix of commercial spaces, which will provide offices, a restaurant, and homes. The developments for Pocket Living – Sheepcote Road in Harrow and Forest Road in Walthamstow – will create affordable homes for first-time buyers in London, some of which will also be adaptable for wheelchair users. Horizon is a new mixed-use development in St Helier Harbour, Jersey marina, featuring 280 apartments, retail, and office space.
